

2023 Fall Leaf Collection

News Release Date
10-04-2023

The City will once again proceed with its annual fall leaf collection. We will determine our start date by the amount of leaves raked into the terrace area, **typically mid to late October**. We ask that you try to get all your fallen leaves out to the curb ASAP. We will make one complete sweep of the entire City before starting a 2nd sweep. If you see the truck go past, you may not see it again for a few days.

When the final week of leaf pick up is determined we will post on the city website. Typically we are done collective leaves the week before Thanksgiving. You may also call city hall for this information. Please remember any leaves left in the road right of way after the City has completed leaf pick up, are the responsibility of the property owner and must be removed per City ordinance. Frozen, wet, or snow covered leaves, sticks and yard waste cannot be picked up with the equipment we have. If you have a way to transport your own leaves to the Webster landfill, it would be greatly appreciated. The South Webster landfill will be open daily during leaf collection for homeowners to bring their own leaves to the landfill.

Mulching your leaves is another great option. It's good for your lawn and helps reduce the amount of time and money spent for leaf collection.
