Free Parking

Compliance with Virginia Graeme Baker Act

The aquatic center includes a zero-depth entry level cement beach and ranges to a 12-foot depth diving well. The pool is always 80-82 degrees. This means that even the youngest swimmers can play in water that is at the right depth for their abilities and comfort. The center also includes two intertwining spiral slides, a plunge flume slide, a frog shaped toddler slide, a one-meter diving board, 48" lap lanes, water jets, and two water activity centers.

The pool is fully staffed by certified lifeguards who protect patron safety, provide first aid and maintain facility cleanliness.
